**B**ased on evaluation of your journal, we would like to index and archive your journal freely, including paper title, authors, keywords, abstract freely. Now please refer the following manuals to complete it. Any further question, please do not hesitate to contact us.

## 1. Index of your journal

In order to add articles of your journals by yourself freely, you should get the authority from us.

1.1 Create one account freely

1.2 Add your journal based on the ISSN

1.3 Send your account and journal ISSN to us

1.4 We authorize you as the editor for your journal

1.5 You use our system freely

## 2. Change of your journal

### 2.1 [My Profile]

<b>Main Menu</b> My Profile My Event My Journal My Jobs ----- Add Event Add Position Add New Journal	<b>Please confirm your details</b>

<b>Title *</b>	EFFECT OF PTEROSPERMUM ACERIFOLIUM LEAF EXTRACT ON OXIDATIVE DAM
<b>Author(s) *</b>	Vinay Kumar Thakur, N. Lumbhani
<b>Page Start *</b>	95
<b>Page End *</b>	105
<b>Keywords</b>	Pterospermum acerifolium, Ulcer, superoxide dismutase, Gastric Enzyme
<b>Source</b>	www.wjpr.net/abstract.php?art_id=58
<b>Abstract *</b>	The role of alcoholic fraction of Pterospermum acerifolium leaf extract on oxidative damages in the gastric tissue during alcohol induced ulceration was investigated. The extract showed significant antiulcer activity against ethanol induced ulceration and as well as significant reduction of tissue, catalase, superoxide dismutase and glutathione were observed to occur with the extract.

**POTENTIAL HERBS AND ITS PHYTOCONSTITUENTS AGAINST FUNGAL INFECTION: A SYSTEMATIC REVIEW**

**Author(S):** S. Gupta, M. N. Satishkumar, B. Duraiswamy, Sushanta Das, Mahavir chhajer  
**Page Start:** 1 - 20  
**Keywords:** Herbal antifungal, Candida albicans, mucosal candidiasis  
**Abstract:** Herbs have been one of the important and unique sources of medicines even since the dawn of human civilization. In spite of tremendous development in the field of allopathy since the 19th century, plants still remain one of the major sources of drug in the modern as well as traditional system of medicine throughout the world. Over 70% of all medication marketed are natural or semi synthetic plant derived. Numerous researches on plants have been carried out for eradicating ailments. Plants and its phytoconstituents are used not only to prevent but also cure various disorders like fungal infections. The incidence of fungal infections is increasing at an alarming rate, presenting a gigantic challenge to healthcare professionals. Many of plants and their phytoconstituents have been studied for their antifungal activity, especially on fungi Candida albicans. The present systematic review focused on their active phytoconstituents of plants that have been found to possess antifungal action against Candida albicans and their various strains.
